

The Agfa-Book of Photographic Formulae, Ed (Classic Reprint)

Excerpt from The Agfa-Book of Photographic Formulae, Ed Pinholes or minute white specks are very common, and are caused by small particles of dust settling on the plate or film while it is being handled in loading the plate holder, making the exposure, or developing, the developer thereby being prevented from properly acting upon the sensitive film. To avoid pinholes, carefully dust the plates, both when loading and just before developing, using either a camels hair brush or a soft velvet covered pad, both of which must be kept clean and dry. The camera should also be frequently and carefully dusted inside. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
