

Beyond the Desert 2003: Proceedings of the Fourth Tegernsee International Conference on Particle Physics Beyond the Standard BEYOND 2003, Castle ... (Springer Proceedings in Physics) (v. 92)

The Fourth International Conference on Particle Physics Beyond the Standard Model (BEYOND THE DESERT 03 - Accelerator, Non-accelerator and Space Approaches) was held during June 9-14, 2003 at Castle Ringberg, Tegernsee, Germany. Traditionally the Scientific Program of the BEYOND conferences, which we started in 1997, covers most of the prominent topics of modern particle physics and astrophysics (see CERN Courier November 1997, pp. 16-18, and March 2003, pp. 29-30). At this conference one of the topics on which we put major emphasis were new theoretical developments in extensions of the Standard Model by Supergravity - which had its twentieth birthday in this year -, by Superstrings and by Extra Dimensions. Two of the inventors of the first superspace formulation of supergravity - Pran Nath and Richard Arnowit- were participants at this meeting. These topics were discussed by Pran Nath (Boston), Dick Arnowitt (Texas A&M) - who concentrated on the connection to dark matter and $g-2$ of the muon -, A. E. Faraggi (Oxford, UK), R. E. Allen (Texas A&M) and A. Kobakhidze (Helsinki Univ.). Fundamental symmetries, including CP violation beyond the Standard Model, a possible time variation of the QCD scale, and the status of preons, were discussed by Peter Herczeg (Los Alamos), M. N. Rebelo (Lisboa, Portugal), R. Lehnert (Algarve Univ. , Portugal), Harald Fritzsch (Munich) and S. Fredriksson (Lulea Univ. , Sweden).
