

A Practical Treatise on Dyeing and Calico-Printing (Classic Reprint)

Excerpt from A Practical Treatise on Dyeing and Calico-Printing The present edition is accompanied with a supplement which brings the art up to the present date. It contains a description of those peculiar coloring products, aniline and murexide, which have excited so much attention in Europe during the past few years. It also contains fresh and recent information regarding madder colors; a mode of rendering textile fabrics fire-proof; processes for detecting the different kinds of dyes on goods, and other useful matter relating to the art. The information presented has been principally obtained from recent patents granted in England and France, and from the transactions of scientific associations. It is arranged for practical use, for the first time, in a work devoted to dyeing and printing. Much of it is in a practical form, while some of it is rather more of a suggestive than of a perfectly finished character. It is believed, however, that this will prove rather beneficial than otherwise, because color chemistry is strictly an experimental art, and the information given must stimulate to many new experiments. The information relating to aniline - that peculiar product of coal tar - is interesting. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
