

Prealgebra with Mathzone

PREALGEBRA extends the successful Streeter/Hutchison/Bergman/Hoelzle series of developmental mathematics worktexts to another course. The book combines Streeters popular pedagogy, including active learning backed by Check Yourself exercises, with an Early Equations approach to prealgebra. Beginning in chapter 1, students are gradually exposed to key algebraic concepts such as variables and equations. The worktext is accompanied by numerous useful supplements, including a SMART CD-ROM, videos, and website.
